

SWAB RIG / BRAIDED LINE SERVICE

TEC Well Service, Inc. has a state-of-the-art swab rig fleet consisting of three hydraulic 9/16" line rigs and three 1/4" braided line swab rigs.

Rigs 14, 30, & 31 – 9/16" swab line

- Hydraulic drawworks and disc brakes for increased reliability
- Electronic instrumentation that provides line speed, gross and net line weight, and the depth of tools
- Automatic safety shutoffs to prevent the rig from exceeding preset depths and line tension
- Capability to email all reports directly from the swab rig in the field

Rigs 16, 18, & 21 - 1/4" braided line available

- Hydraulic drawworks and disc brakes
- Computerized controls via a flat-panel touchscreen monitor
- Automatic safety shutoffs to prevent the rig from exceeding preset depths and line tension
- Real-time reports providing depth, wellhead pressure, and tension
- 1/4" inch braided line that can swab under higher pressure and be used to set collar stops and other downhole tools and devices
- These are perfect rigs to perform plunger installations and maintenance – one rig is all you need to do the complete job.

GIVE TEC AN OPPORTUNITY TO EARN YOUR SWABBING BUSINESS!
